At A Glance

Passport4000C

Simple and convenient cloud based integrated fax and messaging service accessed over the internet.

All the benefits and cost-savings of a market leading, tried and tested Cloud based messaging platform. Imagine using the power of Passport4000C to give you the following benefits:

- Eliminate the cost for on-site physical or virtual infrastructure. Dedicated phone lines, fax and remote print boards, long distance costs are simply replaced by hosted, flexible, volume-based services.
 - Remove T1, SIP, Analogue, PBX and associated costs
 - One vendor solution drives out 3rd party costs and relationships for telecoms/PBX line and call charges
 - No more hardware costs and resources to host and maintain your own messaging systems on site.
 - Eliminate internal costs and time to support own systems and 3rd party relationships
- Faxes priced per page
- With cloud - pay a consistent monthly subscription according to capacity requirements
- No capital expenditure for initial deployment or upgrades
- No capital expenditure to increase capacity
- No long term contract required
- Enjoy flexible peak capacity when required, but don't need to buy capacity to cover the peaks – pay for average ongoing capacity.
- Can scale up or down average capacity as requirements change - only pay for what you need.
- No more software obsolescence, maintenance and updates to worry about. Always enjoy the latest version of technology and immediately benefit from security and efficiency enhancements
- No single point of failure
- Built-in scalability, disaster recovery and business continuity

DATASHEET

SEAMLESS INTEGRATION

Integration has been achieved over the years through collaboration and co-development between Sunquest and Lane.

Our partnership ensures that Passport4000C works seamlessly with Sunquest applications. Passport4000C allows multiple applications to utilize and share a variety of messaging resources concurrently.

A single Passport4000C can accommodate both production and desktop environments. Passport4000C supports a wide scale of report deployment options.

COMPLIANT & SECURE

Compliance requirements, including HIPPA, are achieved through Passport4000C's comprehensive audit and data archive mechanism which keeps track of all messaging and user activities.

Users are assigned roles and appropriate privileges, insuring secure and appropriate access to data. Reporting tools provide management with real-time, extensible system information.

DRIVE DOWN COSTS

Drive Down or Eliminate Costs

Passport4000C is a cloud-based messaging solution that eliminates the traditional on-premises costs.

Customers can leverage the very latest technology whilst making significant savings by removing the need for hardware and software, the physical infrastructure and the manpower required in maintaining messaging applications on-premises.

Fully Hosted, Flexible & Compliant Messaging Solution

Simply replace them with Passport4000C, a fully hosted, flexible and volume-based solution.

Full compliance through security, audit and archive are still maintained. Passport4000C is highly scalable, making it suitable for any size organization.

Fully Integrated Communications

Passport4000C integrates multiple applications. It allows an organization to cost effectively replace disparate messaging systems, reducing redundant and expensive transmission links, and in turn provide its users with a single, reliable and easy to manage platform significantly simplifying communications with your customers and colleagues

PASSPORT4000C

About Us

Lane is a Dedicated Provider of Integrated Messaging Solutions

Within Healthcare, Banking and Commercial markets, operating globally, with offices located in the USA, Singapore and UK

We pride ourselves on developing systems and applications for our clients which suit their method of operation and meet all compliance and security demands.

Our mission is to continue to support their requirements as their businesses evolve, providing deployment, training and 24/7 managed and/or maintenance support.
