

Providing Industry-Leading Solutions for Smarter Data Communications

ERIS supports a wide range of applications while acting as a complete replacement for your EIM (Enterprise Information Management).

ERIS is an all-encompassing faxing solution that supports the processing of job files and gives businesses the ability to process outbound jobs from file systems to be secure and efficient. Once the job is completed, the scheduler provides the job status of all outbound transactions. ERIS is an integrated solution designed to function quickly and reliably from one computing environment to another.

Unlock the Advantages of a Complete Enterprise-Wide Solution

- 1** Completely scalable
- 2** Available as a standalone system or as a docker containerized application
- 3** Inbound routing and processing that support email/SMTP
- 4** Replacement for your entire EIM
- 5** Ensures data integrity through etherFAX's secure network exchange
- 6** Supports Epic, RightFax, GFI/FaxMaker, Lexmark, Fujitsu Scanners, and more.

See How the Competition Holds Up Against ERIS's Immense Capabilities

ERIS	COMPETITION
<input checked="" type="checkbox"/> HITRUST Certification	<input type="checkbox"/> No HITRUST Certifications
<input checked="" type="checkbox"/> Offers real-time network	<input type="checkbox"/> Lack of Real Time Notifications
<input checked="" type="checkbox"/> Highly secure internet transport	<input type="checkbox"/> Charge extra for security
<input checked="" type="checkbox"/> Full-scale defense with multi-level encryption, transport and message level encryption using elliptic curve cryptography (ECC)	<input type="checkbox"/> Standard SSL - no message level encryption
<input checked="" type="checkbox"/> Uses time-division multiplex (TDM)	<input type="checkbox"/> Mix of TDM and FoIP
<input checked="" type="checkbox"/> Uses classless inter-domain routing (CIDR) restriction rules	<input type="checkbox"/> FIFO (First in First Out)
<input checked="" type="checkbox"/> All NA data centers are PCI-Level 1 certified and do not charge extra for certifications	<input type="checkbox"/> Lack of certified data centers
<input checked="" type="checkbox"/> Content destroyed as delivered using the FIPS 140-2 deletion as etherFAX ONLY preserves the call record details	<input type="checkbox"/> Limited visibility, confirmation delivered after job completion
<input checked="" type="checkbox"/> etherFAX continues to evolve - SEN, SENx, Secure Document Delivery	<input type="checkbox"/> Not a fax centric architecture
<input checked="" type="checkbox"/> Reduces global footprint	<input type="checkbox"/> High global footprint
