

Discover the Power of Fax 2.0

Take full advantage of an integrated system that combines the power of the internet with comprehensive faxing designed with stability and security in mind.

Cloud-Based Faxing That Leverages Our Powerful Messaging Platform

With Fax 2.0, businesses can enjoy fast and reliable faxing communications using Passport 4000, which places all of your data communications over the internet.

With greater product stability and consistent updates to its technology, businesses can reap the benefits of the latest in fax while eliminating the need for phone infrastructure or outdated faxing technology.

How does Fax 2.0 Work?

- ▲ **Multi-Level Security:** Fax transactions are processed in a highly secure and encrypted database, with any images or content using the Fax 2.0 system only persisting for the life of the transmission.
- ▲ **Hosted & Flexible:** Replace your fax system in its entirety with Passport and Fax 2.0's flexible solution that maintains full compliance through stringent security measures.
- ▲ **Eliminates PTSN Infrastructure:** Fax 2.0's cloud-based solution surpasses that of traditional faxing by driving down costs associated with operating and maintaining a PTSN infrastructure.
- ▲ **Single Reliable Platform:** Simplified communication through cloud-based technology that never compromises on data integrity.

Transform Your Business Communications With Next-Level Faxing Technology

Experience the benefits of improved transmission speed, removal of fax cut-offs, and outstanding customer service.
