

8 BENEFITS OF FAXING FOR LABORATORIES

As the healthcare sector continues to experience advancements in technology, labs are searching for reliable, scalable, secure, and cost-effective communication solutions. Laboratories at hospitals, clinics and more are using faxing for patient results and communication daily. Read about the benefits of faxing for labs.

Integrations with Technology Partners

Use a faxing solution that integrates with EHRs and other medical platforms to ensure seamless operability. From Epic, Clinisys, Orchard and more, we can pair with any system.

01

HIPAA-Compliant Security

Protect sensitive patient data and documentation with encrypted transmission. Faxing ensures compliance with HIPAA regulations, maintaining confidentiality and safeguarding critical information.

02

Reliable Transmission

Avoid the uncertainties of email delivery. Faxing guarantees the successful transmission of lab reports, patient results, and critical data, reducing the risk of communication errors.

03

Accessible Anywhere, Anytime

Enjoy the flexibility of faxing from anywhere. Access and send documents from any location, enabling quick responses and facilitating collaborations beyond geographical boundaries.

04

Quick Results Delivery

Provide patients with their lab results in a timely manner. Faxing is the most efficient delivery method to give patients ease-of-mind and increase patient care.

06

Cost-Efficient and Time-Saving

Reduce operational costs and save valuable time. Faxing minimizes the need for printing, scanning, and physical document handling, streamlining administrative tasks.

05

Integration with Modern Technology

Experience the convenience of having a digital faxing option. Seamlessly integrate fax capabilities with your existing digital infrastructure, allowing for easy archiving and retrieval of documents at your medical facility.

08

Preservation of Document Integrity

Maintain the integrity of documents and signatures with faxing. Eliminate the risk of alterations or unauthorized access, ensuring the authenticity of laboratory records.

07
