

STREAMLINE PATIENT LAB RESULTS ENHANCING HEALTHCARE LAB COMMUNICATION

HIPAA rules require strict security protocols when sharing patient information, and faxing is a reliable way to transmit sensitive data, particularly lab results. Lane offers innovative faxing solutions tailored to the unique needs of healthcare labs, ensuring security, ease of use, stability, reliability, and cost-effectiveness.

Discover How our Customers Leverage Lane for Laboratory Faxing Solutions

- **Henry Ford Health System:** Increased productivity and efficiency with Lane's Fax 2.0 solution, reducing transmission times and ensuring secure sharing of patient information.
- **Regional Healthcare System:** Improved organizational processes and scalability, handling thousands of faxes monthly with Passport and SR140 solutions.
- **Medical Lab Testing Facility:** Achieved unparalleled speed and security in transmitting medical information with Fax 2.0, reducing failure rates and simplifying communications infrastructure

Contact Lane for Scalable & Reliable HIPAA Compliant Fax Solutions

For labs seeking efficient and secure communication methods, Lane's secure faxing solutions offer unmatched reliability, scalability, and compliance with HIPAA regulations. Contact Lane today to streamline your lab communications and enhance data transmission security.

Why Opt for Lane for Faxing in Laboratories?

- **Security:** Lane's enterprise solution provides end-to-end encryption, ensuring compliance with HIPAA regulations and safeguarding sensitive patient data.
- **Ease of Use:** User-friendly interface and customizable settings streamline communication processes, integrating seamlessly with existing methods like email and messaging.
- **Stability/Reliability:** Backed by decades of experience and innovative practices, Lane's software ensures a stable and reliable faxing system, enhancing efficiency in communications.
- **Cost-Effectiveness:** Lane offers cost-effective solutions for labs and hospitals, reducing paper waste and supporting eco-friendly, digital alternatives.
- **Ability to Audit:** Faxing allows for tracking and auditing of patient data, ensuring compliance with regulatory standards.
